01 FC:1806 180.00 DA

THIRD-PARTY SUBMISSION IN PUBLISHED APPLICATION
(37 C.F.R. § 1.99)

1. The above-identified application has been published on May 12, 2005.

This submission is being made within two (2) months from the date of publication of the above application.

2. Attached hereto is:

☒ A list of patents or publications submitted for consideration by the Office, including the date of publication of each patent or publication.

☒ A copy of each listed patent or publication in written form.

☐ Except that only the pertinent portions of only the following listed patents and publications are being provided.

☐ An English language translation of all the necessary and pertinent parts of any non-English language patent or publication in written form relied upon.

3. Service of this paper and the attachments thereto have been made on the applicant and the proof of such service is attached.

4. Fees Due

☒ Fee set forth in § 1.17(p) (\$180.00)

\$ 180.00

5. Payment of Fees

___ Attached is a ___ check ___ money order in the amount of \$ ___

☒ Authorization is hereby made to charge the amount of \$180.00

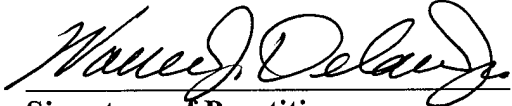

☒ to Deposit Account No. 502413.

___ to Credit Card as shown on the attached credit card information authorization form PTO-2038.

☒ Charge any additional fees required by this paper or credit any overpayment in the manner authorized above.

A duplicate of this paper is attached.

*EXAMINER: Initial if reference considered, whether or not citation is in conformance with MPEP 609. Draw line through citation if not in conformance and not considered. Include copy of this form with next communication to applicant.

1 Applicant's unique citation designation number (optional). 2 Applicant is to place a check mark here if English language Translation is attached.

This collection of information is required by 37 CFR 1.98. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 2 hours to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO:

Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 (1-800-786-9199) and select option 2.

System Software

- Oracle database platform.
- Entirely web-browser based.
- Written in PLSQL, HTML, Crystal and Java Script allowing for a wide variety of software contractors to work on system.
- No downloads or installations to operate.
- Runs just like a website.

R^3 (R-cubed)

Referrals, Reports and Resources
OPO Management Suite

Overview

- Call Center.
- Referral, Recipient and Donor medical record management.
- UNOS Interface and Placement management
- Donor Registry and DMV Interface
- Management modules include system security, staff, hospital, accounting and development.
- Fully Quality Assured including audit trails.
- Customizable Crystal Reporting system.

Design

- System was initially conceived by LOPA Coordinator and QA Director.
- LOPA has expended considerable resources over the past three years in development.
- Design provides for total management of the donation process and OPO.
- R³ is not simply a DARTS replacement.
- New modules are relatively easy to add - presently adding additional accounting, development, staff scheduling and more.

Call Center

- Provides a system for non-OPO personnel to take referral calls and initiate the donation process including gathering Medical and Social data.
- Designed to function in a streamlined fashion predominantly using keystrokes and tabs.
- Automates function of determining tissue and eye ruleouts. Provides for rapid information flow to coordinators on organ eligible referrals.
- Call Center feeds data into the main R³ database for use with the donation and referral process.
- Also functions as message system and log.

Records Management

- Provides for complete control and management of referral, donor and recipient records.
- Maintains contact and contract information for all hospitals, transplant centers, eyebanks, etc.
- Provides complete QA trail for record.
- Records may be updated from any location with Internet access.
- Coordinators and technicians can begin and complete paperwork in the field.
- Electronic records can be reviewed by Transplant Centers.

Security and Management

- Provides a system for 'top down' management of security and access.
- ED 'panic button' locks down system.
- Levels of access are fully controlled and designed by managers.
- All security settings and look up table values are controlled and managed by the OPO ED designate.
- Oracle® is famous for rock solid security - no security holes or patches (which Microsoft® is famous for!)

Other Functions

- System provides invoicing information directly to accounting - increasing cash flow
- Letters to donor families, hospital staff, etc. are automatically generated.
- Automatic system backup both off site and internally within call center.
- Transplant centers can review donor records online at specified and password protected url.
- Double redundant backup operating systems.

Reporting

- Hosted solution provides full access to Crystal Enterprise® reporting system.
- System can provide any number of set reports and provides a system for simple development of customizable reports.
- Crystal recognized as the leading report software company in the world.

Quality Assurance

- System provides a full record of each entry to a file including time, date and user.
- Designed to comply with the requirements of both HIPAA and FDA.
- Ruleout criteria set as determined by various tissue agencies and eyebanks.
- Provides for locking of records once QA accepted.

Advantages

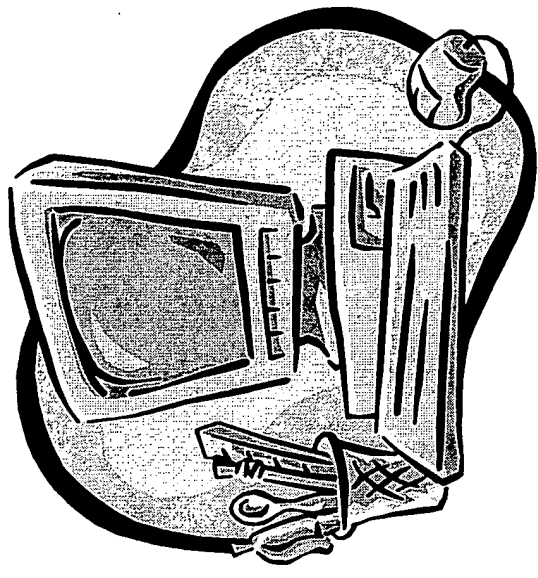

- Scalable system allows for easy addition of modules and growth of users and data.
- Can be customized by the OPO to meet specific needs.
- Development cost can be shared across multiple OPOs.
- Useable as a hosted (shared with separate data base) or stand alone solution.

Solutions

- Available as a hosted solution which shares the cost of the software design, Oracle® and Crystal® licensing. This still allows for customization of look and feel and look up tables while providing a completely separate database for each OPO.
- Also available as a stand alone customizable application to run on independent server systems.

The R³ Project

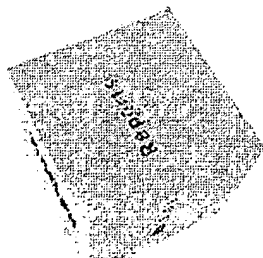

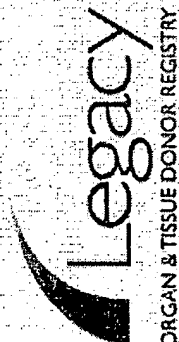

Referrals, Reports and Resources

Presented by:

Vision

- Call Center.
- Referral, Donor and Recipient medical record management.
- UNOS Interface and Placement .
- Donor Registry and DMV Interface.
- Management modules include system security, staff, hospital, accounting and development.
- Fully Quality Assured including audit trails.
- Customizable Crystal Reporting system.

Time Involved & Issues

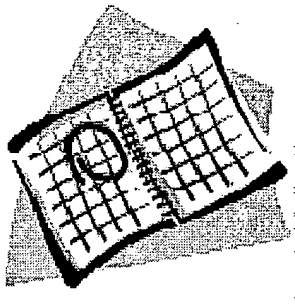

- Year One – Design (October 1999)
 - System was initially conceived by two LOPA Coordinators (now ED and QA Manager).
 - Very time consuming
 - Dealing with Software Company with no prior knowledge of business
 - Liberties taken by software company without LOPA authorization
- Year Two – Implementation (January 2001)
 - System delivered incomplete and yet functioning
 - Continued time consuming pace with poor outcome
 - Web Client based system (download required)

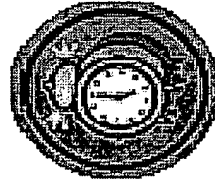

LOPA

Time Involved & Issues

- Year Three – Starting over (January 2002)
 - New software company
 - 9 month delivery date
 - Extremely time consuming due to new project
 - LOPA has expended considerable resources over the past three years in development.
- Delivered project October 1, 2002
 - A few convolution issues after delivery
 - 2 hurricanes allowed delays

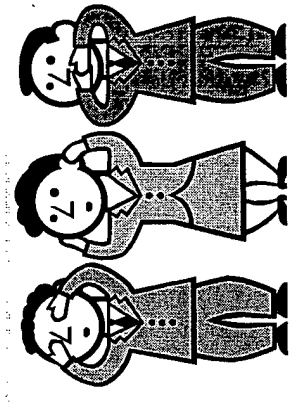

LOPA

Time Involvement to come

- Year Four – New Modules (January 2003)
 - New modules will be relatively easy to add
 - Accounting
 - Development
 - Staff scheduling
 - Transplant Center
 - And more.

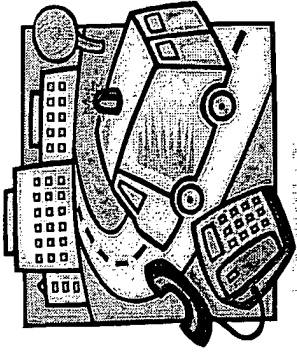

Results - System Software

- Oracle database platform.
- Entirely web-browser based.
- Written in PLSQL, HTML, Crystal and Java Script allowing for a wide variety of software contractors to work on system.
- No downloads or installations to operate.
- Runs just like a website.

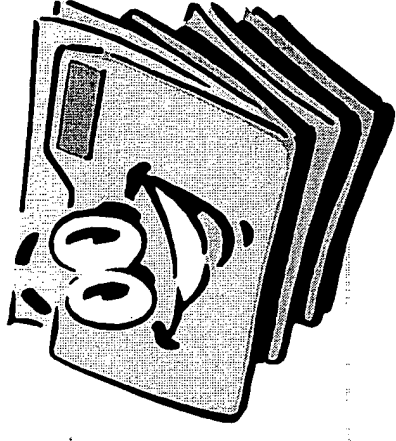

Results – Call Center Module

- Provides a system for non-OPO personnel to take referral calls and initiate the donation process including approaching families and gathering Medical and Social data.
- Automates function of determining tissue and eye ruleouts. Provides for rapid information flow to coordinators on organ eligible referrals.
- Call Center feeds data into the main R³ database for use with the donation and referral process.
- Also functions as message system and log.

Results –

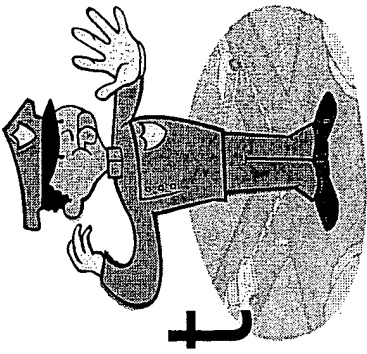

Records Management

- Provides for complete control and management of referral, donor and recipient records.
- Maintains contact and contract information for all hospitals, transplant centers, eyebanks, etc.
- Provides complete QA trail for record.
- Records may be updated from any location with Internet access.
- Coordinators and technicians can begin and complete paperwork in the field.
- Electronic records can be reviewed by Transplant Centers.

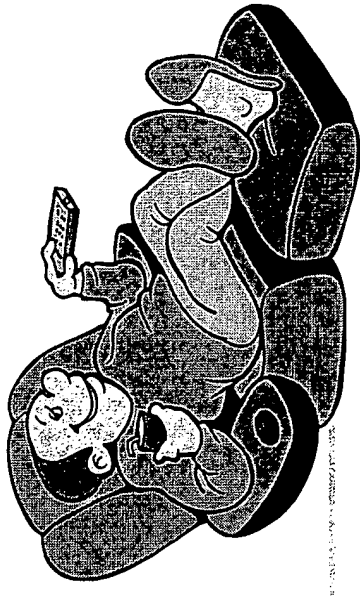

Results –

Security and Management

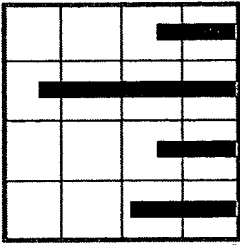

- Provides a system for 'top down' management of security and access.
- ED 'panic button' locks down system.
- Levels of access are fully controlled and designed by managers.
- All security settings and look up table values are controlled and managed by the OPO ED designate.
- Oracle® is famous for rock solid security - no security holes or patches (which Microsoft® is famous for!)

Results – Additional Features

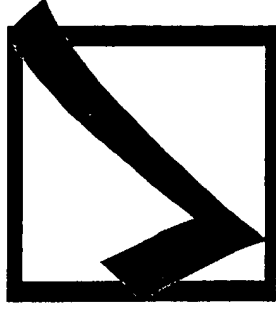

- Letters to donor families, hospital staff, etc. are automatically generated.
- Transplant centers can review donor records online at specified and password protected URL.
- System provides invoicing information directly to accounting - increasing cash flow
- Automatic system backup both off site and internally within call center.

Results - Reporting

- Full access to Crystal Enterprise® reporting system.
- System can provide any number of set reports and provides a system for simple development of customizable reports (RAS or Smart reporting).
- Trained Crystal report writer (me!) always available.

Results – Quality Assurance

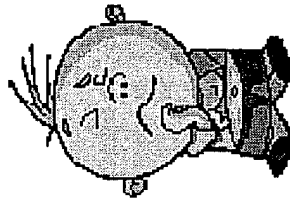

- System provides a full record of each entry to a file including time, date and user.
- Designed to comply with the requirements of both HIPAA and FDA.
- Ruleout criteria set as determined by various tissue agencies and eyebanks.
- Provides for locking of records once QA accepted.

Future Expectations

- Smooth operating system that will house all needed data for agency
- Improved statistical analysis
 - Crystal Enterprise (RAS – Smart Reporting)
 - SPSS
- QA tool – “no blanks” allowed
- Improved recipient follow up information from Transplant Centers.

R R R Referrals, Reports and Resources:

A Database Application for OPOs

Presented by:

Kathy Pizzolato, RN, CPTC

SEOPF Information Technology Seminar

March 20, 2003

LOPA

Overview

- Call Center.
- Referral, Recipient and Donor medical record management.
- UNOS Interface and Placement management.
- Donor Registry and DMV Interface.
- Management modules include system security, human resources, hospital database, and lookup tables.
- Quality Assurance including audit trails.
- Customizable Crystal Reporting system.

System Software

- Oracle database platform.
- Entirely web-browser based.
- Written in PLSQL, HTML, Crystal and Java Script allowing for a wide variety of software contractors to work on system.
- No downloads or installations to operate.
- Runs just like a website.

Design

- System was conceived by a coordinator and Director of Recovery.
- LOPA has expended considerable resources over the past three years in development.
- Design provides for total management of the donation process and the OPO.
- New modules are relatively easy to add - presently designing staff scheduling, UNET, hospital development and quality assurance.

Call Center

- Provides a system for non-OPO personnel to take referral calls and initiate the donation process.
- Automates function of determining tissue and eye rule outs. Provides for rapid information flow to coordinators on organ eligible referrals.
- Call Center feeds data into the main R³ database for use with the donation and referral process.
- Designed to function in a streamlined fashion predominantly using keystrokes and tabs.
- Also functions as message system and log.

Data Management

- Provides for complete control and management of referral, donor and recipient records.
- Coordinators and technicians can begin and complete paperwork in the field.
- Data may be updated from any location with Internet access.
- Electronic records can be reviewed by Transplant Centers.
- Maintains contact and contract information for all hospitals, transplant centers, eye banks, etc.
- Provides complete QA trail for each record.

Security and Management

- Provides a system for 'top down' management of security and access.
- Levels of access are fully controlled and designed by system administrator.
- All security settings and look up table values are controlled and managed by the system administrator.
- ED 'panic button' locks down system.
- Oracle® is famous for rock solid security - no security holes or patches.

Other Features

- Letters to donor families, hospital staff, etc. are automatically generated.
- Ability to add attachments to records.
- Correspondence Log for Family Services communication.

Reporting

- Use either Crystal Enterprise® reporting system or basic Crystal Reports.
- Basic reports come with the package.
- System can provide any number of set reports and provides a system for simple development of customizable reports.
- Crystal is recognized as the leading report software company in the world.

Quality Assurance

- System provides a full record of each entry to a file including time, date and user.
- Designed to comply with the requirements of both HIPAA and FDA (part 11).
- Rule out criteria is managed by system administrator to accommodate specific tissue agencies and eye banks.
- Provides for locking of records once QA accepted.

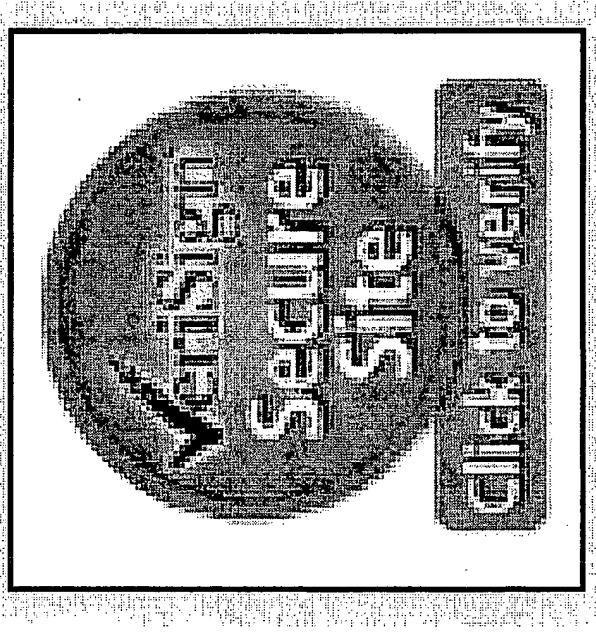

Advantages

- Scalable system allows for easy addition of modules and growth of users and data.
- Can be customized by the OPO to meet specific needs.

Options

- Available as a stand alone customizable application to run on independent server systems.
- Potentially a hosted solution (shared cost of software design, Oracle® and Crystal® licensing). This still allows for customization of look and feel and look up tables while providing a completely separate database for each OPO.

The screenshot displays a Windows XP desktop environment. A calendar application window, titled "Calendar - Microsoft", is the central focus, showing the month of March 2003. The date March 21 is highlighted. The desktop background is a dark blue gradient. Several application windows are open, including "Information" (partially visible), "ASC...", "Type: Orga...", "First Name: MO...", "CEO...", "Information" (partially visible), "TEST", "A...", and "Admission:". The taskbar at the bottom shows the Start button and several icons.

Organ: Serology – Adding a serology

The screenshot shows a software window titled "LOPA - Louisiana Organ Procurement A". Inside, there is a section labeled "Add PRE" with a sub-header "Add PRE". Below this, there are three input fields: "Date/Time:" with the value "03/04/2003 14:21", "Serology Name:" with a dropdown menu, and "Serology Result:" with a dropdown menu. A "Save" button is located below the "Serology Result:" field. To the right of the "Save" button, there is a list of possible serology results: REACTIVE, NON-REACTIVE, NOT DONE, Unknown, Cannot Disclose, and Indeterminate. Below the "Save" button, there is a "Current User:" field with the value "MISHAH" and a "Copyright" field with the value "R.R.". In the bottom right corner, there is a "Time:" field with the value "03/04/03 14:21:36".

Tissue Family Letter 1 of 1

Letter Text

March 04, 2003

Dear :

Save All Print All Print Individual Close Reset

Letter Preview

March 04, 2003

Dear :

On behalf of the staff at the Louisiana Organ Procurement Agency, I would like to express my deepest sympathy to you and your family during your time of loss. I hope it gives you some comfort to know that so many people will be helped by your courageous decision to donate.

Although the loss of your , GEORGE, can never be justified, I hope the knowledge that his gift will help many people, can bring you some solace. From a donation such as the one you made, it is possible that up to fifty people may benefit from transplants that will significantly improve the quality of their lives. Though nothing can ever take GEORGE's place there

A Database Application for OPOs

Presented by:

Kelly Ranum, RN, CPTC

Transplant Festival

March 28, 2003

Overview

- Call Center.
- Referral, Recipient and Donor medical record management.
- UNOS Interface and Placement management.
- Donor Registry and DMV Interface.
- Management modules include system security, human resources, hospital database, and lookup tables.
- Quality Assurance including audit trails.
- Customizable Crystal Reporting system.

System Software

- Oracle database platform.
- Entirely web-browser based.
- Written in PL/SQL, HTML, Crystal and Java Script allowing for a wide variety of software contractors to work on system.
- No downloads or installations to operate.
- Runs just like a website.

Design

- System was conceived by a coordinator and Director of Recovery.
- LOPA has expended considerable resources over the past three years in development.
- Design provides for total management of the donation process and the OPO.
- New modules are relatively easy to add - presently designing staff scheduling, UNET, hospital development and quality assurance.

Call Center

- Provides a system for non-OPPO personnel to take referral calls and initiate the donation process.
- Automates function of determining tissue and eye rule outs. Provides for rapid information flow to coordinators on organ eligible referrals.
- Call Center feeds data into the main R³ database for use with the donation and referral process.
- Designed to function in a streamlined fashion predominantly using keystrokes and tabs.
- Also functions as message system and log.

Data Management

- Provides for complete control and management of referral, donor and recipient records.
- Coordinators and technicians can begin and complete paperwork in the field.
- Data may be updated from any location with Internet access.
- Electronic records can be reviewed by Transplant Centers.
- Maintains contact and contract information for all hospitals, transplant centers, eye banks, etc.
- Provides complete QA trail for each record.

Security and Management

- Provides a system for 'top down' management of security and access.
- Levels of access are fully controlled and designed by system administrator.
- All security settings and look up table values are controlled and managed by the system administrator.
- ED 'panic button' locks down system.
- Oracle® is famous for rock solid security - no security holes or patches.

Other Features

- Letters to donor families, hospital staff, etc. are automatically generated.
- Ability to add attachments to records.
- Correspondence Log for Family Services communication.

Reporting

- Use either Crystal Enterprise® reporting system or basic Crystal Reports.
- Basic reports come with the package.
- System can provide any number of set reports and provides a system for simple development of customizable reports.
- Crystal is recognized as the leading report software company in the world.

Quality Assurance

- System provides a full record of each entry to a file including time, date and user.
- Designed to comply with the requirements of both HIPAA and FDA (part 11).
- Rule out criteria is managed by system administrator to accommodate specific tissue agencies and eye banks.
- Provides for locking of records once QA accepted.

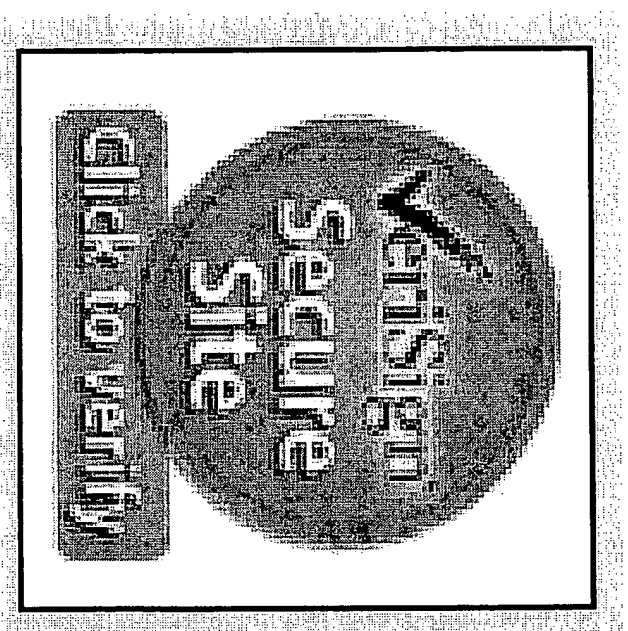

Advantages

- Scalable system allows for easy addition of modules and growth of users and data.
- Can be customized by the OPO to meet specific needs.

Options

- Available as a stand alone customizable application to run on independent server systems.
- Potentially a hosted solution (shared cost of software design, Oracle® and Crystal® licensing). This still allows for customization of look and feel and look up tables while providing a completely separate database for each OPO.

Secure Communications

Conditions of Use

Notice to Users: This is a proprietary computer system and is the property of the Louisiana Organ Procurement Agency. It is for authorized use only. Users (authorized or unauthorized) have no explicit or implicit expectation of privacy.

Any or all uses of this system and all files on this system may be intercepted, monitored, recorded, copied, audited, inspected, and disclosed to authorized state and law enforcement personnel, as well as authorized officials or other agencies, both domestic and foreign. By using this system, the user consents to such interception, monitoring, recording, copying, auditing, inspection, and disclosure at the discretion of authorized staff of LOPA personnel.

Unauthorized or improper use of this system may result in administrative disciplinary action and civil and criminal penalties. By continuing to use this system you indicate your awareness and consent to these terms and conditions of use. LOG OFF IMMEDIATELY if you do not wish to see the conditions stated in this document.

Dear

No recovered tissue data was found for this referral

Tissue Family Letter 1 of 1

LetterText

On behalf of the staff at the Louisiana Organ Procurement Agency, I would like to express my deepest sympathy to you and your family during your time of loss. I hope it gives you some comfort to know that so many people will be helped by your courageous decision to donate.

Although the loss of your, GEORGE, can never be justified, I hope the knowledge that his gift will help many people, can bring you some solace. From a donation such as the one you made, it is possible that up to fifty people may benefit from transplants that will significantly improve the quality of their lives. Though nothing can ever take GEORGE'S place, there

Resources

The first fully

customizable, web-enabled application to facilitate every dimension of your OPD operations.

www.JohnstonMcLamb.com/RS

1 Simplify with one application the management of all of your referral, clinical and development information.

2 Coordinate the full cycle of referrals and transplants—from the initial call to screening, consent, medical/social questions, clinical data, staff scheduling, and development.

3 Control access for each user. Even share specific referral information securely with other authorized organizations.

4 Let non-OPD personnel initiate the donation process.

5 Fully manage referral, donor, and recipient records. RS generates a complete audit trail of changes to each record.

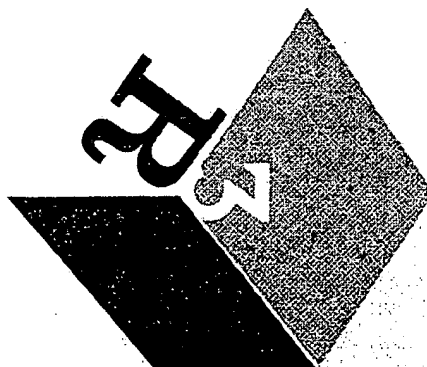

6 Completely customize your parameters for medical/social questions, consent forms, medications, tests, drugs, recovery supplies, and more. Use standard reports or create custom reports using third party reporting tools like Crystal Reports™.

7 Host the application on our off site, using the latest technology for reliable, scalable and secure operations.

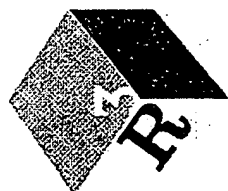

To find out more

about how R3 can help your OP0 run much more flexibly
and efficiently, visit www.JohnstonMcLamb.com/R3.
Or get in touch with us at 703.502.0901
or R3@JohnstonMcLamb.com.
